PROFILE

I'm a recent graduate in Information Security and Forensics with a strong foundation in Software Development, ICT Support and Information Security. I have experience in system development which I gained during my internship at Tech Savanna. Here I worked with different frontend and backend technologies such as Laravel and React. I also have experience in ICT support from Asyana gardens. Here I maintained all the computer devices in the organization. I'm eager to learn and seeking a role that utilizes my expertise in ICT support and system development while being able to benefit your organization.

SKILLS

Professional Skills

Team Collaboration | Adaptability | Communication | Problem Solving | Time Management | Leadership | Customer Care Provision | Attention to Detail.

Technical Skills

Linux | Python | HTML | CSS | React | Laravel | Figma | Canva | Git | SQL | Vulnerability Assessment | Typescript | Next JS | Security Protocols (e.g., IPSec).

Cybersecurity-Cisco

Cybersecurity essentials, Network and Application security, Endpoint security, Cyberthreat management, Network defense, Risk management and Compliance.

Cisco Certified Network Associate - CCNA

Switching and Routing, Wireless networks, TCP/IP, Networking, NAT, OSI, subnets, ACL,s

PROJECTS

Job Portal Application

Developed a responsive job portal web application using React, Next.js, TypeScript, and Tailwind CSS. I implemented authentication using Next Auth. The platform allows users to search and apply for jobs, enhancing the job application process with a seamless and responsive user interface.

Skills: Web-app development, Database management.

File Integrity Monitor

Created a monitoring system using Powershell, Python, and SQL to track file changes. The integrity monitor would notify owners of tampering. i.e., deleting, editing. Powershell handled the alerts, Python managed the logic, and SQL stored the data.

Skills: Scripting, Database management, Integrity monitoring, Hashing, Powershell.
